

# TRY-BEFORE-YOU-BUY

Vendita DCS is an ideal choice for IT departments currently looking to cut the time it takes to create new Oracle Databases, reduce IT labor, provisioning, and deployment expenses, and minimize overall Oracle licensing cost. But don't just take our word for it. Vendita is offering you the opportunity to put DCS to the test, *before* you invest.

## What to Expect:

During the Vendita DCS trial period, customers will be given access to a secure VPN account where they can remote-login and load a sample set of data (up to 50 GBs). Once loaded, customers will be able to run queries, experience & experiment using the AIX® operating system & connect applications to their data. Within the trial period, Vendita will also provide:

-  A Guided Demo of the MAS Engine & iOS Application
-  One-On-One Interaction for Feedback, Questions & Guidance
-  Hands-On Experience of how DCS/MAS Improves Performance

## Availability:

Vendita is offering an exclusive, 2-week trial that allows up to 5 customers at a time to test sample workloads on Vendita's proprietary IBM Power E850C for Vendita DCS via VPN access.

## Eligibility:

Customers who are interested in participating in the Vendita DCS Try-Before-You-Buy program must:

-  Possess a UNIX Terminal
-  Sign Vendita's Data Security Waiver
-  Be Engaged with an IBM Seller or Business Partner

To test-drive workloads & evaluate their performance on Vendita DCS, arrange a no-obligation remote trial that will prove the DCS & MAS capabilities to you and your IT team.
